Diesel & Power
GASKET PRODUCTS

DİZEL CONTA;

Our firm is a company which is enhancing and following the contemporary technology and continuously growing with years experience located in ISTANBUL of TURKEY. We are producing gasket which is going to increase the life of engine, minimize the complaints and be in quality which is used in Automotive industry besides machines and equipment in various industries. The gaskets are made of materials of best quality suitable for the world standards and are produced strictly to prevent leaking. Used perforated sheet material for cylinder head gasket which is plated by tin forms and realizes the hardness and the exhibit. The soft parts prevent leaking without being deformed by heat, pressure, water, static and dynamical pressures. Steel sheet is used for chamber rings to prevent corrosion and resist to high compression of motors. Water and oil holes are covered by Cooper rings to prevent leaking and corrosion. Graphite or silicone are plated on surface to prevent sticking on motor block and the cover due to heat and pressure.

Our object is to submit the best service and highest quality to our dearer customers.
